Study in Senate Says U.S., Soviet Tilt' Is Factor

By Don Oberdorfer

ently lukewarm reception that gov-WASHINGTON - The mili tary balance in the Gulf war has shifted in favor of Iraq, according to a Senate Foreign Relations Committee report. Even if responsibility for the mining could be shown, Mr. Ghali said, the sanctions that could be

The study, issued Monday, said the United States and the Soviet Union had "tilted" toward Baghdad while Iran had been hampered by a worldwide arms embargo.

It did not predict an early end to the conflict, which started four years ago next month. But it said that "several key Iranian leaders appear to be reaching the conclusion that the costs of continuing military efforts are becoming too great" and that Iran's policy toward the war "appears to be in a state of flux."

The five committee staff mem bers who prepared the report visited Iraq and other Gulf states, but not Iran, in two separate groups last month. They also visited U.S. military facilities and reported that 11,500 U.S. personnel are on duty in the Gulf and Arabian Sea area.

# **Israel Jets** Raid Base In Bekaa

### Lebanese Report Palestinians Had Heavy Casualties

New York Times Service

BEIRUT - Israeli Air Force jets attacked a Palestinian guerrilla base in the Bekan Valley in eastern Lebanon on Tuesday and reportedly inflicted heavy casualties.

The Voice of Lebanon, the radio station of the rightist Christian Phalangist party, said as many as 100 people may have been killed when two Israeli bombers destroyed several buildings at the base in Majdal Anjar about three miles (five kilometers) from the Syrian border.

According to the radio, quoting a correspondent on the scene, 25 bodies have been recovered from under the debris, and that 75 were believed to be buried.

An Israeli Army communique quoted by Israel Radio said the base belonged to Sayed Musa, known as Abu Musa, the guerrilla commander who led a rebellion last year against Yasser Arafat, the chairman of the Palestine Liberation Organization.

It was the second Israeli air strike in 12 days against Palestinian positions in the Bekaa region, which is under Syrian control.

On Aug. 16, Israeli planes struck at a camp used by Abu Musa guer-rillas. The Israeli communique said the target was used as a departure point behind Syrian lines for raids against Israeli soldiers.

The Voice of Lebanon, however, said the base belonged to the hardline Popular Front for the Libera-tion of Palestine-General Com-mand of Captain Ahmed Jabril, a former Syrian Army officer.

The Israeli raid Tuesday was shortly after an army spokesman in Tel Aviv announced that three Is-raeli soldiers had been wounded, one of them seriously, in clashes with gunmen in southern Lebanon. Meanwhile, street clashes be-

tween rival Moslem militias in Beirut and recurring fighting in the northern port of Tripoli on Tuesday brought more tension into

# Nicaragua Asserts C-47 **Supplying Rebels Was** Shot Down by Artillery

MANAGUA — Nicaragua has reported that it shot down a U.S.arms and supplies to anti-government guerrillas inside Nicaragua.

The U.S. backed rebels said Tuesday that eight guerrillas were killed in the crash of the plane, a C-47. But the clandestine radio station of the Honduras-based Nicaraguan Democratic Force, Radio 15 de Septiembre, disputed the Nicaraguan assertion that the plane was shot down, saying it crashed because of "mechanical failure."

The radio said the entire crew was killed. "The bodies of the eight commandos of liberty were burned completely," the broadcast said. A communique of the Nicara-

guan Defense Ministry said the plane was downed by artillery Monday in Jinotega province, near the town of Ouilali, about 40 miles (65 kilometers) south of the border with Honduras and 150 miles north of Managua.
The communique said the plane

had frequently made supply flights from Honduras and was shot down as it tried to carry out a resupply

country, instead of buying from Euromissile." Washington Post Service
WASHINGTON — In 1975, after a six-year search for an effective Mr. Komer said, was that Europe anti-aircraft weapon, the U.S. might be overrun in a war, leaving Army took a European missile that the United States nowhere to buy worked reasonably well and began an improvement program that eventually made it too expensive we will have, (a), lost most of our for the Pentagon to buy. army and, (b), lost most of the area

Nine years and about \$1.3 billion later, the program has been canceled because of its cost, but the missile is still in production because of contracts signed years ago. The Defense Department would like to give away the missiles, and the army still does not have the short-range anti-aircraft system it has been trying to develop since

The missile is called the Roland. and its clouded history tells much about the Pentagon's procurement problems, according to Defense Department and industry officials. It shows how the Pentagon and its contractors frequently cannot resist adding expensive, top-of-theline devices and how the Defense Department changes its definition of needs and missions to fit the times and available funds.

The Roland story also illustrates how the Reagan administration's desires exceeded the limits of its record military budgets and how, by the time the administration accepted that the Roland was too expensive, the program had acquired a life of its own.

"It's a fascinating story of how things go wrong, starting with a basically sound decision," said Robert W. Komer, former undersecretary of defense.

The army's unsuccessful 15-year search for an effective anti-aircraft missile may be a worst-case example, but it illustrates a problem of many weapons programs in an era of increasing complexity, officials said. If the Pentagon makes a system as effective as technology al-lows and tests it thoroughly before production, the system is likely to be out of date, and its price unjustified, before it reaches the field.

But if the Pentagon speeds into production without thorough testing, it may end up with a system that does not work.

The army began developing an anti-aircraft missile in 1969, primarily for defense of bases in Westsusceptible to enemy jamming, so a ern Europe, but that program was stopped just before production in ed helped the leaders of Britain's 1974 because it was too expensive and out of date. Konrad Kujau, 46, told judges at his trial on fraud charges that he agreed in 1980 to provide the first 27 volumes of the bogus diaries after Gerd Heidemann, then a reporter for the magazine Stern, promised him the uniform and the money.

Mr. Heidemann, 52, who also is on trial on fraud charges, turned over the supposed diaries to Stern, which paid more than 9 million Deutsche marks (\$3.1 million) for the volumes and published some excerpts in

### Violence Predicted in New Caledonia

SYDNEY (AP) - The Pacific nation of Vanuatu warned Tuesday that there will be a surge of violence in the French territory of New Caledonia because the South Pacific Forum declined to take the issue of Caledonian independence to the United Nations to press for a quicker resolution.

"Violence is going to increase in the next few weeks in New Caledonia" because of the refusal of the forum to back a reference to the decolonization committée," Prime Minister Walter Lini of Vanuatu said. Mr. Lini made the statement at the end of two days of annual talks among leaders of 14 South Pacific nations, held in Tuvalu.

France has said it will hold a referendum on independence for the colony in 1989. Prime Minister Bob Hawke of Australia, the forum's acting spokesman, said Monday that the forum had agreed that France risked violence in the colony if it did not grant independence sooner.

Egyptian Airline to Protest to Libva CAIRO (Renters) - Egypt's national airline, EgyptAir, will protest to

the International Air Transport Association over an incident Monday in which one of its planes allegedly was intercepted by Libyan fighters over Chad, Cairo airport sources said Tuesday. They said the captain of an EgyptAir charter flight carrying Moslem

pilgrims from Lagos to Jeddah complained of having been intercepted several times by two Libyan MiG fighters over Chad.

The fighters took no further action and the Egyptian plane landed safely in Jeddah.

### **Nigerian Borders to Remain Closed** for what the industry calls a "soft

LAGOS (AP) — Nigeria's borders with adjoining countries, closed since a changeover in the currency, in which new bills were printed to replace old ones in April, will remain shut indefinitely because of the country's economic plight, the military government has amounced. Brigadier Tunde Idiagbon, the second-ranking official in the administration of Major General Mohammed Buhari, said in a radio broadcast

Sunday that the borders "will remain closed until satisfactory alternative safeguards for Nigeria's economic plight have been made."

Nigeria's closure of land borders was part of a bid to stop illegal

trafficking of the national currency, the naira, after the military seized power on Dec. 31. The new rulers charged the civilian government with widespread corruption.

# Ex-Reporter For Journal Indicted in Stock Fraud

NEW YORK - A former Wall Street Journal reporter, his roommate and a broker were indicted Tuesday on securities fraud charges in a scheme to trade stock using inside tips about upcoming States to break the sound barrier 37 columns in the newspaper.

The three defendants, all charged earlier in a separate Securi-ties and Exchange Commission civil lawsuit, are R. Foster Winans, a former Journal reporter, David J. Carpenter, his roommate; and Kenneth P. Felis, a former stockbroker for Kidder, Peabody & Co.

A federal grand jury in New York charged that Mr. Winans took \$31,000 in payoffs in return for leaking advance information about his "Heard on the Street" column on the stock market.

According to the indictment, the scheme gained \$700,000 in illegal stock trading profits. Advance knowledge of what would appear in the Journal's influential column gave the defendants an illegal advantage in their stock trading, an-thorities charged.

M. Tendy, said the Co.s. and the office has asked for a delay in the civil suit the SEC filed in U.S. Discrete in New York on May and beyond will look radically different the do now. 17. He asserted that the defendants were trying to use the civil case "as a means to gather intelligence about the grand jury investiga-

Mr. Winans was named in all 61 counts of the indictment on charges of conspiracy, securities fraud, mail fraud and wire fraud. Conviction on each charge is punishable by up

to five years in prison. Mr. Carpenter was named in 15 counts of the indicament and Mr. Felis in 47 counts.

# New X-29A Test Fighter With Forward-Sweeping Wings Unveiled in U.S.

By George C. Wilson

Washington Past Service
CALVERTON, New York Grumman Corp. has developed an experimental fighter plane with a forward-swept wing. It is seen as a return to the kind of high-risk test flying that enabled the United

years ago.
"We decided we had to return to the days when we were willing to take major risks to make spectacular advances," Robert S. Cooper, director of the Pentagon's Advanced Research Projects Agency, tending the plane's rollout Monday in a hangar at the Grumman plant

The forward sweep of the wing on the new plane, designated the X-29A, is expected to give it unusual maneuverabilty for dog-lighting. The wing also promises to decreas friction so it can fly fast with smaller engines than those powering to-

day's fighters.
The X-29A, which has the nose of an F-5 fighter and parts from other planes, will not be put into

But if its new-design wing lives A deputy U.S. attorney, William up to the expectations of Grum-M. Tendy, said the U.S. attorney's man, the Pentagon and the Nationferent than they do now.

The plane got its start on paper in 1976. If all goes well in the litting-out process over the next sev-eral weeks, it will fly for the first time in November at Edwards Air Force Base in California.

The X-29A would crash if it were not for the space-age materials in its forward-swept wing and the computers that can adjust the flight controls 40 times a second to keep the inherently unstable plane stable

Forward-sweep wings have been tried before. The Germans put one on the Junker 287 bomber toward the end of World IL But they could never be made strong enough with available materials to withstand the twisting the wind exerts at high-speed flight unless the wing was

The X-29A is designed to get around this by being built of light, but strong, graphite material bonded together with epoxy.

built unacceptably thick and

The other big problem in stability is expected to be solved by keeping the flight control surfaces in balance through computer corrections that can be made 40 times a second. Three sets of computers are built into the controls in case one or two go awry in flight.

Charles A. Sewell, Grumman's chief test pilot, is scheduled to be the first man to fly the X-29A. Mr. Sewell, a former U.S. Marine Corps fighter pilot with 330 combat mis sions over Korea and Vietnam, was asked what would happen if the computers fail in flight.

"If I lose all the computers, the airplane self-destructs in twotenths of a second," he said.
"That's a tad faster than my reaction time to reach down, find the emergency handle and pull it. But having lived with these guys who are putting the airplane together I have a lot of confidence.

The government, primarily the Advanced Research Projects Agency, has spent \$92 million on the X-29A and Grumman \$40 million. It will be flown faster and faster through several series of flight tests until it is deemed safe to fly faster than sound.

To emphasize the Reagan administration's commitment to advanced military technology, Vice President George Bush attended the rollout ceremony.

Vice President George Bush examines the X-29A jet.

### Fatal Accidents on U.S Highways Rise 5.6 Percent After 3-Year Decline

NEW YORK - Auto fatalities on highways in the United States are on the rise after a three-year decline, an insurance industry sur-

The Insurance Information Institute survey, released Monday, also showed accidents and injuries increasing. The survey covered 14 states representing 54 percent of drivers in the United States.

For the first six months of the percent in 1982. year, fatalities increased 5.6 per-cent from the same period in 1983, the survey said. For the first quarter of 1984, auto injuries were up 7.8 percent and auto accidents were 10.4 percent higher than in the

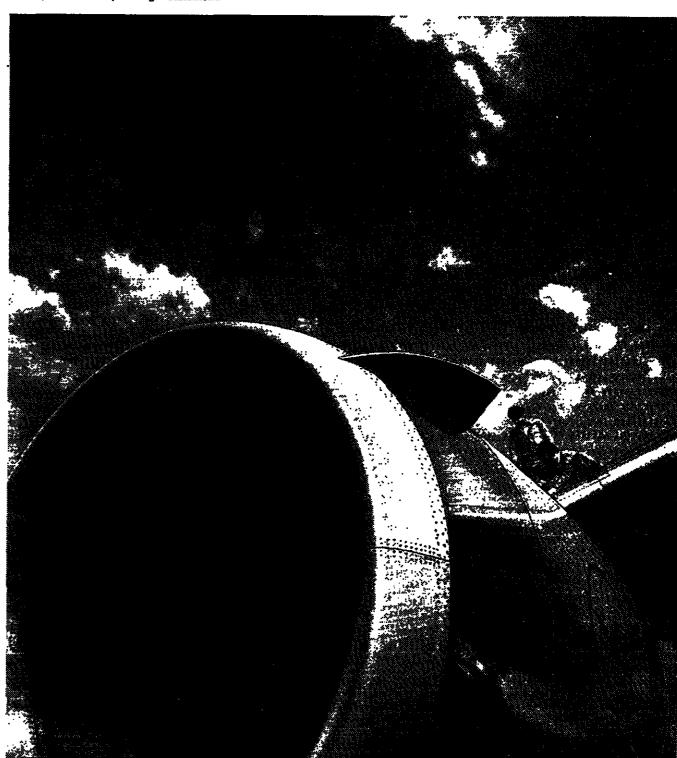

same period last year.

An institute economist, Sean Mooney, said stable gasoline prices and lax attention to the 55 mileper-hour (88 kilometer-per-hour) speed limit contributed to the in-

Drivers traveled 5 percent more in the first five months of 1984 than a comparable period in 1983, Mr. Mooney said. In addition, statistics show 54.1 percent of the nation's motorists exceeded the 55 mile-perhour limit in 1983 compared to 52.6

Among the states surveyed, Washington had the best record on injuries, with a decrease of 1.8 percent in the first quarter this year. The best accident record was posted in California, which showed a decrease of 3.7 percent.

# **Straitlaced Europe Lags**

publicans have been crowing lately about America's miracle in contrast to Europe's malaise: more than 6 million jobs created in America in a year and a half, but none in Europe. This is indeed an exhibit arating parallei — and a sobering one for Europeans.

Some aspects of the comparison are less favorable. It is fair to say that America's almost vertical takeoff has depended on unsustainable growth of the federal budget deficit. (Parts of the Reagan administration ascribe the recovery to the progressive removal of regulations, and that is fair, too.) America's huge and equally unsustainable deficit in foreign trade is also worrying, as is the overvaluation of the dollar. Europe's economic recovery, such as it is to date, has not depended on rising budget deficits; and the foreign account is in small surplus.

Nonetheless, America does have something to crow about, looking at labor markets on both sides of the Atlantic. Europessimism can probably be overdone, but there is something wrong when you can only employ some of the people some of the time and quite a lot of them none of the time.

Europe, more than America, has had to keep its economy on a tight rein for fear of falling back into hyper-inflation. This reflects structural rigidities. Europe's industrial capacity is ill-adapted to provide the products that rising incomes would demand.

For more than a decade, business investment has been extremely weak in Europe. What investment there has been went into labor-saving equipment, and growth has led

President Reagan and other leading Re- to productivity rises, not jobs. This has not been a source of new strength, but simply a delayed process whereby firms have cut previous fat from their payrolls.

When low investment limits job creation, there must be a hang-up somewhere. The market is not telling firms where new demand lies, and is not providing them with the incentive to take the necessary risks.

The failure reflects lack of economic flexibility in at least three directions. Capital markets do not work freely, so borrowers have to rely on the whims of government. Much broader state intervention and regulation limit the initiative of firms. And the inflexibility of wages is pronounced.

Wage inflexibility, in particular, threatens to nail down Europe's coffin. Labor costs are too high to permit the needed investment. Pay agreements have to be more flexible for two reasons: to re-allocate labor between expanding and contracting industries and, often, to change the balance be-tween wages and profits. Altering the wage hierarchy among occupations is much harder than in America. And in the past decade in Europe real wages have risen much more than productivity, which has not been the case in the United States.

Isn't wage inflexibility, despite its social benefits, at least one of the reasons why, in 10 years, 20 million jobs have been created in America and virtually none in Europe? It certainly throws doubt on whether Western Europe can take over from the United States next year in sustaining the world recovery.

INTERNATIONAL HERALD TRIBUNE.

# Slanderer Charges Slander

A new burden of official cruelty appears to have been imposed on the Sakharovs. Yelena Bonner, the wife of Andrei Sakharov and a distinguished human rights figure in her own right, evidently was recently convicted in a one-day secret trial on charges of slandering the Soviet state. Her "offense" was to have considered a tactic - entering the U.S. Embassy in Moscow — to stay out of the clutches of the Soviet police while her husband conducted a hunger strike designed to help her go abroad for medical care of her choice. For this act of personal desperation, which in the event she never committed, she has reportedly been

sentenced to five years of internal exile. The sentence is, conceivably, less severe than the three-year prison term that other dissidents have received. We say "conceivably" because the conditions of her exile are not known --- in particular, whether she will be allowed to be with her husband. Certainly she will no longer be able to travel between the closed city of Gorki, the site of Mr. Sakharov's banishment, and Moscow, an open city (foreigners are allowed there) where she has been his link with the outside world. The family's deepening isolation, by the way, makes it plain why she may have contemplated ducking into the U.S. Embassy in the first place.

Even as the authorities lower a personal Iron Curtain around the Sakharovs, they have undertaken a propaganda operation to cut their losses in world opinion. A familiar Soviet police agent provided Western media with a videotape presuming to show that Mr. Sakharov is well. But the Kremlin's tapes have no more credibility than its official words. Previously there was great anxiety about Mr. Sakharov's health, and there still is. Only by allowing relatives, friends or unofficial witnesses to meet the couple can the anxiety be dispelled.

It needs to be asked: just who is bringing the name of the Soviet state into disrepute? The Soviet government says it is Yelena Bonner, but any halfway reasonable and independent person is bound to conclude that it is the Soviet government. The Kremlin has made an outcast of a man any decent leadership would celebrate, and now, having evidently failed to break his will, it further punishes him by making a "criminal" of a noble woman who, with her husband, represents their country's finest values. It has made itself an object of worldwide contempt for training the resources of a powerful police state on two individuals who may be alone in Gorki, or wherever they are, but who will not be forgotten.

-THE WASHINGTON POST.

# The Next Olympics, if Any

Juan Antonio Samaranch is planning a fruitless mission to Moscow next month. The president of the International Olympic Committee will plead with Soviet sports authorities not to boycott the next Games. His eye is on the wrong target. Another boycott in 1988. when the Games are scheduled for Seoul, would surely risk the survival of the modern Olympics. But survival of the Games in any recognizable form is in doubt anyhow. Mr. Samaranch should be addressing his committee, as well as Moscow. The Games are threatened by two problems that the committee could solve if it had the gumption - political boycotts and the myth of amateur athletes.

Politics. It is too much to ask spectators not to wave flags. National pride is a given. But the culprits are flag-waving governments. The boycott of the 1980 Moscow Games seemed a proper protest at the time, but it bolstered a destructive process that began with the African boycott in 1976 and was continued by the Russians this year. A boycott against the Games in South Korea — whose government is not even recognized by the Soviet Union and China - would be devastating Mr. Samaranch's effort to persuade the Soviets to commit themselves to Seoul may be a necessary gesture, but not even Konstantin Chernenko

could answer now for policy four years hence. Much as the South Koreans would be disappointed to lose the Games and the spotlight in 1988, they would make a greater mark by proposing that the IOC pick a permanent.

lutely boycott-proof, the committee should also establish and enforce penalties. All nations might be required to commit themselves to participate at least two years - instead of two months - in advance, at the risk of banishment from future Games.

Amateurism. The nonsensical rules governing eligibility have reached the point where full-time professional soccer players competed in Los Angeles while in tennis some truly amateur stars were barred. A young man who makes his living playing American football cannot compete in track. But not-very-covert professionalism is rampant. In such big events as track, basketball and skiing, top athletes make hundreds of thousands of dollars a year from commercial endorsements and fees for appearing in nominally amateur events.

In ancient Greece athletes were subsidized The amateurs-only rule for the modern Olym-pics was not born of idealism. It was meant to limit the Games to moneyed gentlemen. There is confusion now because the IOC, refusing to face reality, lets committees for each sport write eligibility rules. It is time for the committee to declare all sports open to everyone.

National politics and the sham of amateurism have long since killed the original modern Olympic spirit. But the Los Angeles Games showed how much enthusiasm exists for keeping the Games alive. Only strong leadership by the IOC can realize that ambition.

### FROM OUR AUG. 29 PAGES, 75 AND 50 YEARS AGO

1909: American Wins Flying Contest RHFIMS, France - There was a great tussie at Rheims [on Aug. 28] for the Coupe Internationale d'Aviation between Mr. Glenn H. Curtiss and M. Louis Blériot, and the historic trophy goes for the first year of its existence to America. After a quick round of 7min, 55 1/5sec. in the morning for the 10-kilomètre speed test, Mr. Curtiss immediately went out for the two rounds for the Coupe Internationale. His first round took 7min. 57 2/5sec. and his second 7min. 53 1/5sec., which beat the record. M. Blériot raised excitement by doing his first round in the same time as Mr. Curtiss' record, but owing, as he explains, to his motor misfiring, he dropped away in the second round and lost the cup by six seconds.

1934: A Mock Air Attack on Paris

PARIS - At a zero hour toward dawn tomorrow [Aug. 30], 500 of the most powerful military airplanes of the formidable French air fleet will be at grips in the sky, somewhere in the environs of Paris, in a simulated deadly struggle for the existence of the "City of Light." This spectacular encounter between an attacking force swooping down upon the capital and a defending force which will rise into the air to the city's aid from the west and the southwest, will constitute the first air maneuvers for the safeguarding of Paris from air bombardment. The declared object of this acrial battle is "to take stock of the means of active aerial defense in case of a sudden attack from the air on the Paris region."

# Halt This Action-Reaction Nuclear Race

W ASHINGTON — Is the function of an American presidential campaign to score debating points or to educate the public on the most important issues facing the nation and the world? Unfortunately, this time around, the opportunity for debate on the fundamental issues has been lost in a welter of charges and countercharges about issues of vastly less significance and meanwhile the prospects for a September meeting between the United States and the Soviet Union on the threat of the militarization of

outer space have gone glimmering.
Since President Reagan unveiled his "Star Wars" scenario in March 1983, two conflicting rationales have been presented for continued research and development of a ballistic missile defense. The president justified his idea as one that would eventually make nuclear missiles obsolete. Another school of thought believes that a ballistic missile defense can reduce the vulnerability of U.S. land-based missiles and thus im-

prove U.S. ability to deter a nuclear attack. Mounting evidence suggests that no ballistic missile defense can be made reliable enough to accomplish either goal. This was the conclusion of the Congressional Office of Technology Assessment. Scientists of the caliber of Hans Bethe, who won the Nobel Prize for Physics in 1967, have expressed similar doubts. And in the meantime we have ignored the possibility that a new round of weapons development will fuel the everescalating arms race with the Soviet Union.

The current impasse between Washington and Moscow over a moratorium on ann-satellite weapons is a closely related issue, for it has been suggested that a ballistic missile defense could also be used for the surveillance and possible destruction of satellites performing other than legitimate observation missions. A ballistic misBy John B. Anderson

The writer, a former Republican Representative from Illinois, is chairman of the National Unity Party, which is fielding no candidates in 1984.

sile defense is thus clearly the first step toward the militarization of outer space.

What is the likely Soviet response? As in the past — after virtually every major weapons development undertaken by America - it is likely to be a reaction in kind. U.S. development and testing of these weapons in outer space will

We have arrived at a moment in history when a miscalculation in the arms race could have profound consequences.

almost certainly spur the Russians to develop their own space weapons — yet another instance of the nuclear "action-reaction syndrome." In the late 1960s the United States flight-tested

multiple independently targetable re-entry vehicles. In 1969 I was the principal co-sponsor (with then Democratic Representative Jeffrey Cohelan) of a resolution to seek a moratorium on the further flight-testing of such multiple warhead missiles. The resolution gathered 104 co-spon-sors yet was never voted upon in the House.

The principal argument against the moratorium was that this was a technology in which America was much further advanced than the Soviets, and that to perfect it was to ensure U.S.

superiority over their nuclear weapons. I argued that continued testing would simply be an incen-tive to Moscow to perfect a similar weapon. In the 1970s the United States proceeded to A Moment

Of Decision

For Ghana

By Margaret A. Novicki

This is the first of two articles.

N EW YORK - Flight Lieuten-ant Jerry Rawlings has won a

potentially significant victory in his

quest to reverse Ghana's two-decade-

After more than a year of negotia-

tions with the multinational-owned

Volta Aluminium Company, the

onerous terms of a 1962 agreement

under which Africa's largest alumi-

num smelter was built - as part of

the Volta River project, the Nkrumah

era's grand industrialization scheme

- have been revised. The new deal

goes some way toward compensating

for development dreams never real-

ized, and in real terms could earn

Ghana an extra \$50 million a year.

But the concessions obtained -

higher taxes, tolks, and import duties;

a tripling of the fee paid for electricity; a 15-percent reduction in VAL-

CO's use of power - will not add a

penny to the government's hungry coffers until Lake Volta, which feeds

the big hydroelectric scheme upon which VALCO depends for power.

recovers from the worst drought in Ghana's post-independence history. VALCO's smelter has been moth-

balled since November, when the level of the lake dropped so low that the

government had to ration electricity.

The Rawlings government's recent efforts at reversing Ghana's down-

ward economic spiral have been daunting. Few African countries

have seen as precipitous a decline in their short post-independence histories, or have faced such overwhelming historical and natural odds in trying

When Mr. Rawlings seized power for a second time in late 1981 promis-

ing sweeping social transformation,

Ghana's economic profile was a text-book Third World disaster. That was

all the more tragic because of its

natural endowments - gold, bauxite,

diamonds, cocoa, timber, offshore oil

In 1981, Ghana's foreign exchange

earnings financed only one week's

worth of imports, and international aid had been reduced to a trickle. Production of the major hard curren-

cy earner, cocoa, was at roughly half

the level of a decade earlier and

fetched only one-third of the 1975

world market price. The road and

transport system was near collapse

from lack of spare parts and inputs.

government revenues. A grossly over-valued currency bred a thriving black market, making sales of increasingly

scarce imports and domestic goods more profitable than production.

Drought struck in 1982, magnify-

ing the economic woes and creating

the worst food shortages since inde-

pendence. Bushfires destroyed one-

third of the aging cocoa trees and

acres of timber forests. The hydro-

electricity shortage left industry

operating at 10 to 15 percent of ca-

pacity. And early in 1983 more than

a million Ghanaians were expelled

long economic decline.

equip its land-based Minuteman-3 missiles with multiple warheads. America was ciently ahead of the Russians. Yet by 1980 Ronald Reagan was talking about a "window of vulnerability" — the possibility that the Soviet Union could destroy America's missile force. Why? Because the Russians had by then put multiple warheads on their SS-18s and other land-based missiles.

The initial U.S. monopoly on the atom bomb was short-lived. The decision to proceed with a hydrogen bomb then led the Soviets to develop a thermonuclear counterpart. And the cruise missile program of the 1970s spurred the Soviet military to a similar effort. The United States is still ahead in cruise missile technology, but the Russians are rapidly closing the gap in both land-based and sea-launched cruise missiles.

One does not have to embrace unilateral disarmament to comprehend the futility of this kind of competition. It does not lead to greater security. Indeed, in the area of space weapoury it complicates the effort to rely on national technical means to verify compliance with arms control agreements. The perfection of killer satellites can only hamper such verification, undermining exng agreements and making it increasingly

difficult to arrive at new ones.

Barbara Tuchman has said that history is an account of the unfolding of miscalculations. We have arrived at a moment in history when a miscalculation in the arms race could have profound consequences. The question is: Are we willing to be students of history or are we simply going to relive our past mistakes?

The New York Times

# Are Today's Republicans A Party of Government?

By David S. Broder

from this temporary capital of the uled for station-break time, and was Democratic campaign, the question that keeps recurring is why the Re-publican convention was so much less than it should have been.

The mood in Dallas should have been ebullient. President Reagan came into town leading Walter Mondale by 14 points nationally and was out front in almost every state opinion survey. Republican polls showed growing support for their congressional candidates, as well. The Democrats looked to be in disarray, and the post-Olympic summer mood of America was as upbeat as any incumbent could hope. So it was not mere braggadocio for Mr. Reagan to say on his arrival that Republicans are

the party of the future." But the Republicans did not talk or act as if they felt that confidence in themselves. The tone of the oratory was overwhelmingly negative. It was an assault on the Democrats that was reminiscent of the days when Republicans had been so long the minority party that they had fallen into the shin-kicking psychology of the per-petual loser. Many of the speeches seemed to have no purpose other than "bugging the Democrata." The feeling I had leaving Dallas

was that, even though they have controlled the White House and the Sendo so again, Republicans are a long many tongues were bitten in Dallas, way from thinking of themselves as the party of government. Part of the explanation may be that

many of the Republicans who do govern were not there. Dozens of elected officials yielded their delegate seats to women to help the party's image — or because they had no particular interest in the proceedings. Those who did show up may have regretted it. Senate Majority Leader Howard Baker and House Minority Leader Robert Michel have been the front-line commanders in the "Reagan revolution," but their treatment at the convention certainly showed

ST. PAUL, Minnesota — Looking portation and guest credentials. Mr. back at the Republicans in Dallas Baker's speech was originally sched-

rudely ignored in the hall.

As for the people who make up Mr.

Reagan's "cabinet government," they
were, unless female, kept entirely off stage, as if they were just the political pygmies or party parials that the Democrats claim most of them to be. Another part of the explanation may be that this was Mr. Reagan's farewell appearance as a candidate and many delegates to the conven-tion worry and wonder how their

party will survive without him. Certainly the atmosphere was different from that at the Detroit convention four years ago, when the con-servatives who had followed Mr. Reagan's banner for 16 years realized that they were finally about to enter the promised land on the Potomac. This year, with Mr. Reagan's last campaign at hand, the theme song

seemed to be "Is That All There Is?" Whatever the cause, this was not a governing party's convention. People in a real majority party are confident of their identity and the future. The Republicans in Dallas were neither. Indeed, the two things they definitely did not want to talk about there were the future and themselves.

They did not want to talk about themselves, lest they stir dissent. The differences in their ranks are just bebut the number was high: conservatives not saying what they really think about keeping George Bush a heartbeat away from the presidency for another four years; moderates and liberals not saying what they think about the religious fundamentalists who have moved into so many of the state party organizations.

The White House was aware of the subsurface tensions. The Reagan campaign director, Edward J. Rollins, blocked a floor vote on an innocuous rules change to give bonus dele-gates to states that elect Republican legislatures, because, he said, "in this no sense of their party's appreciation. kind of convention, any fight of Mr. Michel had to scramble for transkind of convention, any fight can

seem afraid of controversy or unwilling to talk about the future were the young House conservatives, under Republican whip Trent Lott of Mississippi. That group wrote its eco-nomic and social policy prescriptions into the platform.

Even though they are part of a eemingly permanent minority in the House, they have consciously adopted the psychology of government and are eager to make long-term plans. Some in the group, particularly Representative Jack Kemp of New York, have gained a lot of publicity for their "new ideas." But their apparent victory in the realm of policy has been almost too easy. They cap-tured the platform committee with-

Schmidt fully recognizes (and Mr.

hardly remove the need for NATO, to

which a major U.S. contribution

would remain indispensable.
It is a fact of life that if nuclear

stalemate dictates a stronger NATO

conventional deterrent, the added

non-nuclear forces must come pri-

marily from Western Europe's two

strongest continental powers. How-ever unrealistic the Schmidt proposal

may seem today, it is the best way to

go. The WEU or some other Europe

political weight that they were right.
Not more than a dozen members of the 106-member platform committee joined the handful of House hotshots in serious dialogue on these issues. With few exceptions, Republican senators and governors were not in on the discussion at all. The convention delegates as a whole treated the platform with indifference.

This was not the constitutional convention for a new political order, it wasn't anything close to it. Mr. Reagan may give the Republicans another four years in the White House. But the challenge of making this a majority party will fall to other

people in another year. The Washington Post.

# European Defense: Schmidt Has Aired a Good Idea

By Robert W. Komer

WASHINGTON — There are W encouraging signs that Ameri-ca's European allies are finally begin-ning to rethink the NATO security problem. At bottom this reflects concern over such great dependence on the U.S. nuclear umbrella at a time of nuclear stalemate and growing Soviet conventional strength.

This concern was catalyzed by the INF controversy over installing U.S. medium-range missiles in Europe. It is reinforced by the repeated warn-ings of the allied commander in Europe, General Bernard Rogers, that he would have to seek a nuclear re-sponse within a few days of any Warsaw Pact attack, and by his resultant pleas for more non-nuclear spending.

U.S. allegations that the allies are not carrying their "fair" share of the mutual defense burden, culminating recently in Senator Sam Nunn's pro-posal that the United States start withdrawing troops from Europe if the Europeans don't do more, are also heightening European anxiety.

Any NATO effort to create a stronger conventional posture will take more troops to provide credible forward defense in depth. By far the most sensible proposal to this end has come from former Chancellor Helmut Schmidt, still probably the closest thing to a statesman that Europe has produced in the last 15 years.

Speaking to the Bundestag on June 28. Mr. Schmidt proposed raising the nuclear threshold by a "French-German security initiative" that would restore Western Europe as a more equal pillar of the Atlantic Alliance, strong enough to permit some American forces to go home.

Mr. Schmidt calls for creation of a

force of some 30 French and West German divisions; many of these would be reservist formations; because of the high cost of active forces and the end of Europe's postwar baby boom. Recognizing that more money would be required to equip these divisions, especially the French

The writer was undersecretary of defense in the Carter administration. contingent, he proposes that West template greater European "independence" as the price. Moreover, Mr.

Germany help fund French re-equipment with funds freed up by reducing the West German investment in nuclear-capable weapons systems. In turn, Bonn would ask Paris to extend the nuclear umbrella of the force de frappe over the Federal Re-public. French-German arms cooper-ation would also be stepped up to

produce equipment common to both.

To date this trial balloon has been practically ignored in Paris and in Washington, which is not wholly sur-prising. France, in particular, will hardly react warmly to proposals that go against the grain of the "independent" role it has so carefully nurtured since de Gaulle was in power, a role still so popular that no French politician can take more than modest, quiet steps to modify it over time. Yet France under François Mitter-

rand is showing more interest in a stronger European conventional defense, including discreet suggestions that revival of the moribund Western European Union would provide a suitable framework. France's new force d'action rapide is explicitly stated to be designed to help France support its allies rapidly if it chooses to do so - another straw in the wind. There are even reports that Mr. Schmidt talked with Mr. Mitterrand before launching his trial balloon.

Washington's lack of reaction is less understandable. Although Mr. Schmidt himself thought that initial U.S. reactions would be "partly critical," it is not clear why this should be so. On the contrary, he bills his proposal as a direct response to the Nunn amendment. It is highly responsive to the longstanding U.S. effort to get Europe to carry more of the weight of its own defense.

In our more rational moments, Americans are even willing to con-

an institution could be used. And the last thing any of France's allies should do is insist that France first reioin NATO's military wing.

> to join France's European allies in finding discreet ways to support a greater French de facto contribution French nuclear independence.

nurture this tender plant.

On the contrary, the way of wis-dom would be for the United States to the common defense. Nor should America insist on compromising

In sum, Helmut Schmidt has put on the table a highly promising way to put more flexibility into NATO's flexible response strategy, while achieving more rational burden-sharing between Europe and America. It is in America's national interest to

ern donors pledged an additional \$150 million. But a year later, while the Ghanaian government continues to earn acclaim for its commitment to see reforms through - even from the Reagan administration, which recently ended a partial freeze on devel-opment aid — the domestic stakes for Mr. Rawlings have risen.

The writer, editor of the bimonthly Africa Report, contributed this article to the International Herald Tribune.

### LETTER TO THE EDITOR

Yes to Abrams on Turkey Turkey's loyalty to NATO. Time was

As an American who spent six of the crisis years of the 1970s teaching in a Turkish university, I feel I must respond to columnist Colman Mc-Carthy's bitter criticism of Assistant Secretary of State Elliot Abrams ("Abrams on Turkey: His Outrage Is Selective," Aug. 13). Back in Washington I regularly read The Washington Post and usually supported Mr. McCarthy, but not this time.

Mr. Abrams is absolutely right in his view of the military. My students were among the young people torn literally limb from limb by bombs placed in coffee shops near university bus stops. I know from experience how many times the military has stepped in to restore balance - dishave too many small parties to give a and institutions conden

and usually stepped right out again.

when America could do no wrong in the eyes of Turkey. Even in 1974, when Turkey gave military support to the smothered Turkish minority on Cyprus and a strong Greek lobby in America managed to get an embargo imposed on Turkey, I saw nowhere in Turkey the familiar "Yankee Go Home's slogan that has appeared on so many walls in so many countries. Turkey decided instead to stand on its own feet and stick to its principles:

stay in Cyprus but also in NATO. I have the greatest repect for the accomplishments of the military government in Turkey, especially Turgut Ozal, now prime minister but earlier the architect of the economic reforms that brought Turkey out if its 400percent inflation to some stability turbed because the Turks, deter- and a rapidly growing economy. I mined to make democracy work, watched with dismay as governments

clear majority to any major party — or imposed sanctions.

True, the generals stayed in power Mr. Abrams is also right about longer than usual; but you cannot

know how bad a situation they had to Contend with unless True, Turkish jails are no fun, and True, Turkish jails are no fun, and I have had my own run-ins with the The land hurreaucracy that keep the the be-

By Steve Lohr New York Tunes Service MANILA - The Philippines has seemed at times to be a nation brimming with anti-American sentiment. In the anti-government demonstrations last week, the United States trailed only Presi-

get of criticism. The variations on the anti-American theme are several. Imperialism and the International Monetary Fund, which has demanded austerity measures in exchange for newloans, are high on the denunciation list. But the most popular rallying cry is "Down With the U.S.-Mar-

cos Dictatorship!" U.S. influence in the Philippines, a former American colony, can scarcely be exaggerated, many Fili-pinos and Western diplomats agree. Evidence of that influence, they say, is everywhere. Those carrying anti-American banners, they note, are often clad in Levi's jeans and Harvard T-shirts; some smoke American cigarettes.

rom nearby Hassan Khel was re-In addition to the fixation with foreign goods, especially American ones, political, cultural and material expectations in the Philippines seem to be measured against the U.S. standard. For many Filipinos, their country is found wanting, and their reaction is to try to move to the United States.

Each day outside the U.S. Emseen the scene of heavy fighting visa applicants gather. "All those. American polemics.

attitude toward America," said Ballesca, an office worker, said, Carlos P. Romulo, 85, a former

U.S. officials in Washington and Manila note with relief that while the strength and boldness of the Communist insurgency in the Philippones has increased, the guerrillas have not singled out U.S. diplomats or corporate executives as tar-

"Of course not," said an Asian diplomat stationed in Manila. Killing Americans would be one of the most unpopular things imaginable in this country. The Communists aren't stupid.

The Philippines became an independent republic in 1946. But nearly four decades later, nationalism here seems to be less an expression of any indigenous values or ideas than a reaction against what many Filipines call the U.S. control of the local economy and political life. In the view of some nationalists.

Mr. Marcos has sold out the country to U.S. military and economic interests in return for being propped up by the American government. Such thinking seems to be behind the "United States-Marcos dictatorship phrase on banners and bumper stickers. The demonstrations reached a

high point on Aug. 21, the first anniversary of the assassination of Benigno S. Aquino Jr., the opposition leader. The huge march also elicited an outpouring of anti-

But one of the many thousands are the best tribute to the Filipino of demonstrators. Allonso ena, the state capital.

"What looks like and sounds like anti-Americanism here is really nationalism."

The real problem, many say, the less direct expressions of U.S. The Philippine education system for example, is modeled after that in the United States. It has strong liberal arts programs and

excellent law schools. But the economic success stories of East Asia, like Japan, South Korea and Taiwan, placed much more emphasis on training engineers and technicians in basic skills.

"The liberal arts emphasis in our education system is one of the unintended effects of the American colonial era, and it has hurt us tremendously," said Bernardo M. Villegas, a Harvard-trained economist at the Center for Research and Communication, a private group.

Another Filipino, Crisostomo B. Vitue, sees a simple solution to economic and other problems. Mr. Vitug is the chairman of the Manila chapter of the Philippine Statehood U.S.A. Movement, and his group advocates making U.S. influence far less ambignous than it is now.

# French Nuclear Tests Pose No Health Risks. Pacific Scientists Say

By Iain Guest

GENEVA - Two high-level scientific groups have concluded that France's program of nuclear test-ing in the Pacific has resulted in emissions of radioactivity that are well within international standards and pose no immediate risk to

In a second conclusion, one of the groups said that plans by Japan to dump low-level nuclear waste in the Pacific "would pose extremely little risk to human or environmental health and well-being."

The results of the two surveys, conducted independently, followed Monday's call by 14 South Pacific states for the region to be declared a nuclear-free zone.

Meeting on Funafuti Atoll in the west-central Pacific state of Tuvalu, the 14 nations reportedly called for an end to French nuclear tests and criticized Japanese dumping plans. The conference failed to endorse a proposal by New Zealand to ban passage by ships carrying nuclear weapons.

Diplomats and United Nations officials in Geneva agreed that the pressure was likely to increase on France following the disclosure that the French freighter Mont-Louis, which sank Saturday off Belgium, was carrying several containers of radioactive material to be processed in the Soviet Union.

An official predicted that the accident would lead to "searching questions" about France's ability to transport, store and dispose of radioactive material.

The two new reports were prepared by scientists from South Pacific nations, notably Australia, New Zealand and Papua New Guinea, which have been among France's most severe critics.

One was written by five scientists who spent 10 days visiting the French nuclear-testing facilities on the island of Mururoa and laboratories at Papeete, Tahiti, in October. The group included an official from the Australian Atomic Energy Commission and was led by the former head of New Zealand's Na-

tional Radiation Laboratory.

5 Die in Crash in California

United Press Internationa REDLANDS, California -San Bernardino Mountains.

Pacific Regional Environment Program, a grouping that was estab-lished with help from the UN Environment Program. It is scheduled to meet in the French territory of New Caledonia on Sept. 18 to continue negotiaious on an anti-pollu-

tion treaty. Both reports agreed that inhabitants of the South Pacific region are exposed to a lower dosage of radio-activity from natural causes than other regions of the world. This is due to the low concentration of radioactivity in coral soil and the fact that the people spend-more time outdoors, where exposure to

radioactivity is less intense. The two groups also agreed that the shift from atmospheric to underground nuclear testing by the French has reduced exposure from artificial causes to a level that is "two to three times lower" than in regions of the Northern Hemisphere that have been exposed to atmospheric tests, and carries no risk to health.

Since its nuclear program began in 1966, France has carried out 113 tests in the Pacific, 45 of them atmospheric and 68 underground.

The five scientists who visited Mararroa added that health statistics for the region showed no evidence of a connection between nuclear testing and cancer.

The group also complimented the French authorities on their disposal of nuclear waste. "Waste management at Mururca was poor, it is now very good," the scientists

In spite of their generally favorable tone, both reports disputed a French claim that any leakage of radioactive material from Mururoa is virtually impossible. In 1977, the French began conducting tests in shafts bored into the lagoon after a huge chunk of the atoll broke off following an underground explo-

sion and triggered a tidal wave. The French authorities told the scientists that 99 percent of the radioactivity from explosions is trapped underground. This claim, said the group "is not borne out by the data inspected."

Contaminated water, the group The second report was prepared warned, could eventually start to by five consultants to the South leak into the lagoon within a period of 500 to 1,000 years.

Diplomats and officials in Geneva predicted that the two reports would be the subject of debate at the Sept. 18 meeting in New Cale-Four adults and an infant were donia, where France, Japan and the killed when a light plane lost power United States are expected to resist on takeoff Monday and crashed renewed calls for curbs on nuclear into a truck in the foothills of the tests and dumping of nuclear waste in the Pacific.

# Jamaica's Jungles Yield Rich Harvest As They Give Way to Farms and Fish

By Joseph B. Treaster New York Times Service

MAY PEN, Jamaica - Two years ago the vast Clarendon Plain west of Kingston was covered with thick jungle and underbrush.

Now, more than 5,000 acres of the reddish-brown earth are plowed in neat furrows that yield tomatoes, melons, peppers, cucum-bers and flowers. More than 100 acres have been carved into fishbreeding ponds.

The farm, which is using an irrigation system developed 15 years ago at a kibbutz in Israel, now produces 50 to 75 percent higher yields than Jamaican experts had

anticipated. The project includes up to 1,600 Jamaican laborers and a group of 32 Israeli agricultural experts.

The involvement of the Israelis is part of an effort by Prime Minister Edward P.G. Seaga to attract enough foreign investment and technology to put more than 237,000 acres of idle or underused land into cultivation.

Besides the Israelis, Japanese farmers are growing Jamaica's renowned Blue Mountain coffee, Americans are growing rice and ba-names, and Englishmen are tending

Mr. Seaga has said most of the foreign farms, including the Israeli project, are supposed to serve as "mother farms" that will provide technology and marketing assistance to Jamaican farmers, most of whom are working on plots of 10 acres (4 hectares) or less.

Fli Tisona, managing director of two experts from the Israeli kib-the project involving the Israelis, butz to direct local workers. says he plans to give seedlings and lend technicians to 100 Jamaican farmers this winter. He plans to buy their crops at guaranteed

# Salvador's Army Changes Tactics

### Troops Feared for Their Brutality Now Try to Win Villagers' Confidence

By Lydia Chavez

New York Times Service

OATECA, El Salvador - The colonel and the peasant stared into the dark, listening to the murmur of soldiers settling into invouac. A soldier had toppled a hen from a tree vith a slingshot, and the officer and farmer were vaiting for their chicken dinner.

The colonel asked if people in Joateca, a town in the northern province of Morazán, supported

"Yes," the old man replied.
"Many?" the colonel inquired.
"Yes," he answered.

ms and Lish

Marie Auto 7

The officer is Lieutenant Colonel Domingo Monterrosa, 44, the commander of the eastern region of El Salvador, and he wants those civilans back on his side. He and his military peers
did not always know how to do that or whether, in fact, it was necessary. The province has generally been under guerrilla control and the Salvadoran Army has just begun visiting it again.

In 1981, Colonel Monterrosa's troops were avolved in a military operation in which about 500 civilians reportedly died in El Mozote, an abandoned village that can be seen from the armer's porch in Joateca. Now, with visits and promises of help. Colonel Monterrosa and his roops are trying to win popular support in these anall towns.

The colonel's evolution seems to reveal how the attitude and approach of the Salvadoran Army have changed after five years of fighting a rivil war. The army has a long and brutal history that will not be easily overcome. But there are signs that the arrogant and often insensitive army that ruled El Salvador for more than 40 vears has progressed.

A Salvadoran political analyst who has been a harsh critic of the army conceded: "In general, improved a few notches."

The improvements have just begun. Human rights abuses still occur, incompetent comof the left and the new civilian government of civilian government, it could quickly reassert its Jose Napoleon Duarte, could still block peace authority. negotiations.

exceptionally vocal in the last year, reaching a sometimes referring to them at town meetings as "Salvadoran brothers who have taken the wrong

The army that ignored the popular vote and took the 1972 election away from Mr. Duarte supported his election on May 6, 1984. At least for the time being, it is working with him.

In El Salvador, military support of a civilian president was precedent-breaking. Such support is something people in the United States "take for granted," a government official said. In El Salvador, "you can't imagine how hard it was and what that means for the

ountry," he added. Now more conscious of the military's international image, Colonel Monterrosa has been a pacesetter in showing the new style. He has opened his barracks to the press, and reporters often travel with him during military operations. Even his colleagues who used to shun the

press now take reporters' calls and sometimes

acknowledge shortcomings in fighting the war. Survival is the motive that is uppermost in the minds of the officer corps. If the United States its performance in terms of the people has requires the Salvadoran Army to rid itself of extremist officers to survive, those officers will apparently be sent to foreign posts, as many have been in the last year. In the same respect, it inders remain, and the army, ever suspicious the army begins to feel too threatened by the

When officers staged a coup in 1979 and gave Moreover, while the army has demonstrated power to a military-civilian junta, the military was full of internal dissension. ives, he said, were "very inexperienced" politi-"My feeling was that those with a lot of experience could have sufficient ability to fool the other members," Colonel Monterrosa said.

THE feeling was shared by a majority of the officer corps. Prodded by the extreme rightists, Colonel Majano was eventually

U.S. pressure for changes in the army became peak when Vice President George Bush visited El Salvador at the end of 1983. It eventually provoked a transfer of extreme rightist officers to foreign consulates or to the Inter-American Defense College in Washington.

The removal of more moderate and rightist officers alike has left a more professional officer corps. This group of officers is tied to U.S. aid and appears less likely to stage a coup. But it also seems unafraid to exert its power.

Mr. Duarte is well aware that he needs the army's support before he can open talks with the leftist rebels. The army is still uncertain about such talks.

At the time of the 1979 coup, the military confronted deep and persistent social unrest much of it directed at the entrenched and brutal power of the army. Colonel Monterrosa said the depth of the social unrest was new to the army. He concluded that army officers could have developed "confusion and doubts, including those that cause misbehavior.'

His troops were not immune In December 1981, his Atlacatl Battalion killed nearly 500 civilians in the area of El Mozote in northern Morazán, according to reporters who went to the scene three weeks after the operation. Investigators from the U.S. Embassy never reached El Mozote.

Colonel Monterrosa said he was not in El Mozote with his troops. He remains sensitive about what happened there. "Do you want me to say I killed a lot of

civilians?" he asked during one interview. His troops, he said, marched up through northern Morazán in 1981 and asked civilians along the road if there were guerrillas up ahead. "They said no," he said, "and we walked right into an ambush "

When the topic of El Mozote came up in another interview, he said that "a lot less" than 500 civilians were killed.

There were some 90, something like that." He said that when there is bombing and artillery fire, civilians sometimes "stay in between the two sources of fire and can't get out."

A Salvadoran soldier rests in a local cemetery while on patrol.

The realization among military officers that they need civilian support has come slowly.

S the internal politics have settled and the left has grown stronger, the commanders have begun spending more time in the field. Instead of dealing only with the wealthy landowners, as they have long done, commanders and soldiers have slowly begun to acquaint themselves with the peasants and

"Someone doesn't have to tell them now that there are people out there without food," a former officer said. "They can see it."

They also seem to have learned lessons from

abuse of human rights and what happens in a to win support from people who provide them with food as well as intelligence on army move-

Colonel Monterrosa said he needs civilian intelligence reports to win the war. "It is the most important" kind of intelligence, he added. When the colonel walks into a town such as Joateca now, he calls a town meeting and talks to the people about the left and democracy. He also asks what they need and follows up the

requests by bringing doctors or bags of grain. Regaining the confidence of people who see the left more often than they see the army is a slogans the left had painted on the walls of the slow process. But it is a process that appears to mayor's office. They replaced them with slogans

have some effect. There is a marked difference in the relationship between the army and civilians in northern that is to say, we defend the rich, we defend the

In northern San Miguel, soldiers have girlfriends in the towns and civilians are unafraid to approach Colonel Monterrosa and ask favors or simply chat. In Joateca, many people are still

Colonel Monterrosa's town speeches do not acknowledge past errors but look to the future. "We are not an army that is at the service of any bourgeois or privileged group," he told the peo-ple in Joateca as his soldiers painted over the of the armed forces.

The left, San Miguel, where the army has been visiting poor and we defend all of the civilians in this official said, was in a gray area between a clear by demonstrating more concern, has been able for eight months, and the relationship in Joateca country," he said. "We believe in democracy."

# Outcry Over Tests Reflects Cameroon's Fragile Unity

By Howard French

Washington Past Service

OUALA, Cameroon — A debate over secondary school examinations has aroused Cameroon's English-speaking minority, and has sharply illustrated the delicacy required of government in the maintenance of a fragile unity in the country.

Late last year, English-speaking students at Cameroon's national university in Yaounde, the capital, vigorously protested a plan to modify the end-of-school examination used in Englishlanguage high schools, which is inspired by the British General Certificate of Education. The plan urged adoption of the exam used in the rest of the country, which is modeled after the French Baccalauréat.

Cameroon is the only African country to use both English and French as official languages. The policy is a legacy of the 1972 union between former British and French colonies under the rule of Ahmadou Ahidio.

From 1961 until a June 1972 referendum to unite them, the British- and French-speaking parts of Cameroon had been federated.

Since that vote, which created the United Republic of Cameroon, many English speakers have complained of dominance by French

sident of the National Assembly."

Mr. Ahidjo is a Moslem from northern Cam-eroon, which is largely peopled by the Hausa and Fulani ethnic groups. When President Paul Biya came to power in November 1982, after Mr. Ahidio retired, Cameroon's English speakers were greatly encouraged by the new president's tour of their two western provinces.

Mr. Biya, who is from the south, addressed his English-speaking audiences in English, an event without precedent in Cameroonian politics. His use of the themes "rigor and moralization" led many people to believe that they were finally to receive the attention from the national government that they felt they deserved.

N editorial in one of Cameroon's Englishlanguage newspapers reflected anglophone concerns, urging Mr. Biya to allow for "an equitable sharing of the national cake, including a place at the table for the bakers." That was a reference to the fact that Cameroon's oil resources are largely concentrated off the coast of the anglophone Southwest

To the dismay of Cameroon's English speakpeakers, "All of our leaders were bought out ers, who make up one quarter of the estimated

and co-opted under Ahidjo," said a prominent population of eight million people, Mr. Biyr's However, before the presidential clash, the English-speaking lawyer. The highest position time in office have been marked by a bitter country had gained a reputation for stability unity has been severely tested.

Mr. Ahidjo, who retained leadership of the country's sole political party, the Cameroon National Union, when he handed over the presidency, later was accused of trying to engineer a return to power. Mr. Ahidjo, who has lived in France since July 1983, was sentenced to death in absentia in February.

In April, a coup was launched by soldiers and civilians who came from Mr. Ahidjo's northern region, and who were said to be close to the former president It was crushed at the cost of numerous lives

in Yaounde, when the national army rallied to Mr. Biya's support. In a conciliatory gesture for which he was subsequently criticized, Mr. Biya later reduced

the sentences of the plotters.

R. Ahidjo's greatest offense, in the eyes of most Commence. Provoke regional and ethnic tensions. Cameroon is, for its size, one of the most ethnically and geographically diverse countries in Africa, and easily lends itself to the schisms that have made many African countries so difficult

cite it as a rare African success story. Cameroon's wealth, which remains intact, is based on a dynamic agricultural sector and modest oil ex-

Many observers say that regional and ethnic tensions have been given too much importance in explanations of the April rebellion.

They argue that Mr. Biya's theme of "rigor and moralization" had threatened the entrenched interests of a wide range of Cameroonians, in both politics and commerce, who then plotted for a return to the status quo.

Some criticize the use of the slogan "rigor and moralization," saying that none of those who became rich when the Ahidjo government was in power have been tried on corruption charges.

A businessman in the town of Limbe responded to that view by saying: "There has been a change of mentalities under Biya, People no longer fear open discussions, as they did under Ahidjo."

The protest of Yaounde's English-speaking students succeeded in getting the government to reconsider its educational changes — something unheard of under Mr. Ahidjo, when Cameroonians rarely dared to protest.

school in Douala, western Cameroon. A plan to impose an exam modeled after the French end-of-school tests has angered English-speaking students.

# Austria Feels Political, Financial Pressure to Reduce Number of Soviet Bloc Refugees

refugees passing through Austria want to settle U.S.A." he said, indicating the crowded quarin the United States, Canada or Australia. West ters he shares with eight other men. "It's the

Tens of thousands of refugees from the Eastern bloc have been processed through this building at Traiskirchen, Austria.

# ARTS/LEISURE

# The Kelly Family: Staying Together and Singin' on the Road

PARIS — Dan Kelly grew up in Massachusetts in a closely knit Irish family that sang together in the evenings. His wife Barbara, a dancer, came from a similar environment. After they had married to work with his hands, he was near Talavera in southern Spain, and had four children, he realized that the singing and dancing had stopped some time ago. They hardly even spoke to each other any more. Dan Kelly threw out the TV

SAN DANIELE

sang and danced in the streets. Soon our kids were doing it. Suddenly we were all singing and danc-

fiestas around southern Spain. Some of the children learned in-

Although they own a home near Pampiona, they have basically been on the road ever since. When interviewed, they were passing through Paris on their way from Brittany to Luxembourg. There are 10 children now, aged 2 to 20. Since Kelly's wife died two years ago he keeps them together alone: "It's very

They have recorded five albums of traditional and religious songs in Spanish, German, Italian and English. The records are popular in the Netherlands and West Germany, and the Kellys have become familiar faces on Dutch and German television. Headquartered in France now, they spend a lot of time in Brittany where they feel at home through common Celtic roots. Barclay Records will release the first Kelly Family French recording next month.

"Then it's not a real musical experience any more," Kelly added: "It's not good for the kids. I turned sic to go for more money than you need you're throwing away something precious for something less precious. We don't lack anything, we're happy, we're holding our-selves together."

The family performed in summer Dan Kelly does not believe in work

struments. They performed in larger towns, and on TV. Kelly watched closely. He had a lear of show business. "Mostly it's a bad business. They're not performing for fun. They tend to be exhibitionists, greedy, egomaniacs. But the people loved the kids and the kids loved presenting their music. I saw that it could be positive. It was good for the children to give and for the audience to receive."

Television arrived in the village. The villagers began to keep one eye on the screen. "Too bad," Kelly said to himself eight years ago. "Guess we just got in on the tail end of something good. That's it." The family packed their van and went on the road.

hard. She was very special."

Kathleen is the oldest child: "Eddie Barclay came to hear us sing in the Metro. He hadn't been in the Métro for 20 years." She laughed: "We're best in that sort of situation. When you play for people in a formal concert environment you're supposed to act like important stage personalities and we don't like to do that."

an sense of reverence for the arts." Kelly has no reverence for for-Trapp family. They wanted to filter our voices and build this silly image self. Luckily I know how to do that of something we're not. When we I use the McGuffey readers to need money we just go on the street teach them English. As far as I'm concerned" the 19th-century readers are "still better than the fancy methods they use today. They just want to sell books today. The kids learned math in Spanish. Kathleen speaks English with a Spanish accent: "We support each other. We help each other study. Our biggest problem is that toomany people want to be our friends. People are attracted by a close family. We lose a lot of time with people like that. Some people just want to use us one way or another, and besides our life is so full we don't really need friends. We go our own way." Who decides which way to go? Is the Kelly family a democracy?

Dan Kelly with daughter Kathleen, 20, and son Johnny, 18.

# Musical Starts and Stops Mar 'Starting Here'

By Sheridan Morley International Herald Tribune

T ONDON - From "The Fantas-L ticks" across 30 years to "For-bidden Broadway," the history of the trans-Atlantic musical is littered with small-scale cabaret shows that though triumphant off-Broadway have traveled badly, if at all, to London. One reason may be that there are

gnon, you know, kitsch," Kathleen

Sometimes it's not so simple.

permits: "We're not doing any-

thing wrong. We're not hurting anybody. So I say, well, O.K., this

law doesn't apply to us. I refuse to

admit that the authorities have the

right to decide whether you can

Earlier this summer they were

singing in front of the St.-Germain-des-Près church in Paris. Accord-

ing to Dan, "This twitty priest came out to stop us. He said music

interferes with their work. They've

Even in the present production, the present production, the present production, the present production, the present production is the kind of show that would work the kind of show the kind of show

Because "Butley" is a funnier play than Osborne's "Inadmissible Evidence," it has usually been regarded as slightly less of a dramatic triumph. It has always seemed to me that we have here not only the best collection of academic laughs since "Charley's Aunt" but also a wonderful display of sheer playwriting bravado.

Butley is seldom off stage and seldom out of a monologue. An arrogant, bitchy, plotless torrent of abuse pours out of him, directed lovers, students, failing electric used to do vaudeville routines, and all.

### INTERNATIONAL MANAGER

# trapreneurial' Culture nks Into Europe Psyche

By SHERRY BUCHANAN International Herald Tribune

RUSSELS - Thanks to best-selling management books and aggressive consultants. U.S. buzz words usually travel fast and far. But do they travel well? With Thomas Peters' and Robert Waterman's "In Search of Exceland Rosabeth Moss Kancor's "The Change Makers," an managers accustomed to stricter corporate hierarchies been hit with a notion culturally alien to most of them.

authors' recipe for a company's success is to allow the is innovative and talented managers — intrapreneurs' — to ar own thing by encouraging them to set up smaller as units either within the company structure or with the pany's managerial, tech-gical and financial back-

Some Europeans

t in a postwar Europe

wonder whether has had a penchant for incing large — and often intrapreneurs can be i risk takers, the do-your-thing approach to corpolitie is likely to run into problems, wedish managers, with apparent st wedish managers, with apparent st trained or are born.

wedish managers, with apparent success, have been the first ise to the intrapreneurship bait. Scores of large Swedish panies, including LM Ericsson, Volvo, ASEA, the large trical concern, and Uddeholm Tooling, one of the world's est specialty-steel concerns, have introduced different manment structures to encourage intrapreneurship. Sweden even a School for Intrapreneurs.

he concept is spreading to the rest of Europe. But European manies, unlike many of their U.S counterparts, are not ping on the intrapreneurship bandwagon out of a fear of ag their more talented managers.

aced with massive layoffs, many companies are adopting this moach in the hope of creating new jobs and finding a niche for magers they can no longer afford to keep on the payroll. In Hece, it's called essaimage and the government is encouraging to companies like Saint-Gobain, Pechiney and Elf Aquitaine multiply their small business ventures.

HE danger is that intrapreneurship becomes a panacea for solving Europe's unemployment problem instead of a management strategy to induce technical innovation and fit. A worse-case scenario would be that large companies, ecially state-controlled, feel obligated to continue subsidizing profitable business units. Intrapreneurship would then be just ew industrial unemployment-insurance policy.

But even if all goes well, intrapreneurship is unlikely to spread fast in Europe as it has in the United States. Highly competie European companies usually complain that they cannot get ir people out the door, not that they cannot hold them back. There is a natural culture in the U.S. that we don't have," says

tish manufacturer. "When we started investing in smaller - ™ = = transmesses not one manager from Pilkington even came along to cuss the idea. It was only when we had to start cutting back on r management strength that Pilkington managers started exessing interest in managing smaller business units. You need enething that makes you jump out of it."

Given the apparent lack of interest among managers, some

ropean companies wonder whether they can train people to European managers also believe that it is easier for U.S. -mpanies to accommodate a separate intrapreneurial structure th its own often substantial reward system without creating ckbiting or envy.

Another obstacle that European managers mention to imple anting intrapreneurial structures is that they often face unions at are hostile to the whole idea of smaller business units that by may not have a good grip on.

There are few Enropean examples of an intrapreneurial corpose culture. Used to government subsidies, many European

mpanies are still trying to instill in their managers the idea that (Continued on Page 11, Col. 8)

# **GM Offers** Pay Hike To UAW

### **But Ford Makes** Vague' Proposal

DETROIT — General Motors Corp. gave the United Auto Workers a contract proposal on Tuesday calling for pay and cost-of-living es and job security, while Ford Motor Co. offered a "vague" proposal on job security but no

raises.

The GM and Ford proposals are the first formal offers the companies have made to the UAW in the three-year contract talks that began

The union is seeking job security and substantial but unspecified wage and benefit increases for 350,000 workers at GM and 114,000 at Ford. Contracts at both companies expire Sept. 14.

GM said its plan could provide more than \$8,000 in added pay and benefits for each worker over the

Workers would receive raises of \$600 in the first year and \$300 in the second. No language was of-fered on the third year. Cost-ofliving adjustment payments also

GM also proposed an increase in ension benefits to \$1,000 a month from the current \$900.

"This proposal is designed to further enhance the well-being of our employees and the corporation's ability to succeed in the mar-ketplace," GM's vice president, Alfred Warren, said.

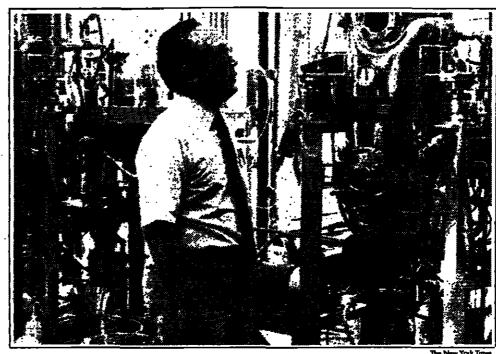

Mr. Warren said he thought a proposal could be drafted to address the union's concern on job security while allowing the company to outsource, a term for sending work to outside sources.

The GM proposal was much more detailed than the Ford plan, leading observers to say that GM is more likely to be selected the union's strike target when leaders eet Wednesday.

The Ford proposal calls for a job security program and guaranteed income for senior workers whose plants are closed, as well as inovements in other benefits. Ford's labor relations director, Stanley Surma, said at a news conference that company projections show that workers profit-sharing payments this year will be what they were in 1983, about \$1,760 a

tillo, conceded that the company's language on job security was vague,

"perhaps deliberately vague."
The UAW's vice president, Stephen Yokich, said. "In their view it's a starting point.
"In my view I wish they'd started about a mile ahead of where they

Akio Sato of Japan's Fermentation Research Institute inspects a fermentation tank.

# Japan's Expertise in Fermentation Leads to Bigger Role in Biotechnology

By Andrew Pollack
New York Times Service

TOKYO - For centuries, soy sauce has been made by fermenting soybeans and other ingredients for six to eight months. Now, Kikkoman Corp., the world's largest soy-sauce producer, is experimenting with a process that can reduce the fermentation time to one

The soy sauce "bioreactor" is one example of Japan's distinctive push into biotechnology.

Hundreds of years of making soy sauce, tofu, sake and other traditional food and drink have given Japan great expertise in fermentation, or the ability to change substances through the use of micro-organ-isms. And fermentation is becoming a key technique in the biotechnology industry.

While small entrepreneurial companies have led the move into biotechnology in the United States and Europe, food and liquor companies are in the van-The Office of Technology Assessment, a research

branch of Congress, said in a report in January that Japan might surpass the United States in the commercialization of biotechnology.

Akio Sato, an official at the Japanese government-run Fermentation Research Institute which has been studying fermentation since 1940, agreed. "If we can combine the old technology with the new technology, we will have great power in this area," he said. Biotechnology usually brings to mind advanced techniques, such as genetic engineering. The best-known example involves recombinant DNA, in which

a gene to produce, say insulin, is implanted into pacteria, which then start making insulin. Once a few bacteria are induced to make a substance, the bacteria must be grown and multiplied so that the substance can be mass-produced. It is in this

Still, many researchers here say that fermentation is not enough to put Japan in the forefront of biotech-nology. They say that Japan must also catch up with the West in genetic research.

"The Office of Technology Assessment study very much overestimates the Japanese situation in biotech-nology," said Masami Tanaka, director of the bioindustry office at the Ministry of International Trade

Japanese corporate research and development spending on biotechnology totaled about \$220 million in 1982 and has been growing at 20 percent a year. Government expenditures directly on biotechnology amounted to about one-lifth that level.

Kyowa Hakko Kogyo Co., which specializes in fermentation, illustrates the Japanese approach to biotechnology. The company started by making alcohol for sake and shochu, two popular Japanese drinks. Then, in the 1950s, it began applying its fermentation expertise to pharmaceutical products such as In 1956, Shukuo Kinoshita, now the company's

chairman, discovered micro-organisms that could be used to make L-Glutamic acid. That substance, in turn, is used to make monosodium glutamate - better-known as MSG, a flavor enhancer — as well as amino acids used in seasonings

Now, Kyowa Hakko wants to apply its expertise to produce interferon, a potential cancer-fighting sub-stance, and other products of gene-splicing. Last September, it announced a process for mass-producing

To get started in genetic engineering, many Japa-nese companies initially teamed up with U.S. or European concerns.

Shionogi & Co., a pharmaceutical concern, recently completed clinical testing of human insulin produced through recombinant DNA techniques. The technology was licensed from Eli Lilly & Co. and Genentech Inc., both U.S. concerns.

But Japanese companies and universities have re-believe that FCA purchased a sig-cently begun producing original work and transferring nificant number of Disney shares, technology abroad. Last weekend it was announced that researchers at ment purposes.

Dai-Ichi Seiyaku Co., a pharmaceutical manufacturer, and Totton University had produced interferon by genetically altering a virus that lives in silkworms. mass-production stage that Japan's expertise could be liquor company. It was the first concern to use a more liberal provisions than those synthetic gene, rather than one isolated from a cell, to that govern other S&Ls, the activiproduce gamma-interferon, the type of interferon ty is atypical of the thrift industry viewed as most promising as an anti-cancer agent. in that state.

In December, Suntory and Schering-Plough Corp., "This is highly unusual activity,

In December, Suntory and Schering-Plough Corp., the U.S. pharmaceutical company, announced an and California is one of the few agreement in which Schering-Plough would get access states that even permits this for to Suntory's technology. In return, Suntory would get state-chartered institutions," said access to some of Schering-Plough's technology.

# **Knapp Resigns As Chairman of** Financial Corp.

LOS ANGELES - In an effort to try and restore faith in Financial Corp. of America, Charles W. Knapp resigned as chairman of the nation's biggest mortgage lender, the company said Tuesday.

In a letter to company shareholders, Mr. Knapp gave up his utles as chairman of the board, director and chief executive officer. effective upon appointment of a

Mr. Knapp informed the board of his decision at a meeting Monday. His replacement was expected to be named by Wednesday.

"In recent periods, we have faced a number of abnormal difficulties, each requiring decisions that have been exceptionally trying because of their complexity," Mr. Knapp said in his letter. "Pressures have been unrelenting and it is now clear that additional management changes are necessary to best pre-serve depositor and shareholder confidence.

Last Thursday, Mr. Knapp relin-quished his control over the firm's

Allen G. Bortel, an analyst with

And referring to Charles W. Knapp, the chairman of FCA who has announced his resignation, Mr. Bortel said, "This is characteristic of Knapp and his unique way of doing business compared with the

FCA earned \$3.5 million in fees for agreeing to provide Mr. Stein-berg with \$200 million if he decided to launch a hostile bid, through his Reliance group, for control of Dis-ney, according to court documents from a suit filed against Mr. Stein-

berg by Disney shareholders. Unusual trading activity in Dis-ney shares prior to the announcement on June 11 that Mr. Steinberg had agreed to sell his 11.1-percent Disney stake back to the company is under investigation by several regulatory agencies, according to a New York Stock Exchange spokes-

The FCA was aware that Mr. Steinberg was negotiating an agree-ment to sell his stake to Disney before the information was made

Prior to Mr. Steinberg's agree-ment to sell his shares back to Disney, the price of the company's stock soared to a trading high of \$68.875 on speculation that he would launch a takeover bid. The price of the company's shares fell almost \$11 during the hour that the shares were permitted to be traded on the New York Stock Exchange on June 11, immediately preceding the announcement of the buyback

### Hong Kong Says Exports Up 45%

HONG KONG - An export-led recovery of Hong Kong's economy was sustained in the first half of 1984, the 20vernment said Tuesday. The report said the local economy's health reflects that of its major export markets, with the value of exports rising 45 percent in the first half from a year earlier.

Short-term prospects for domestic exports are likely to remain encouraging, the report said. It said domestic demand unemployment falling and inflation slowing.

Exports to China grew an in-

flation-adjusted 57 percent in the half, with the result that China has become Hong Kong's third-largest export market, after the United States

# Futures Panel Approves German Panel Mexico, Major Banks Said to Agree Chicago-Singapore Link

By Kenneth B. Noble

New York Times Service WASHINGTON - The Commodity Futures Trading Commission voted Tuesday 4-0 to permit a link between the Chicago Mercantile Exchange and the Singapore International Monetary Exchange. The link will be an important step toward creating the first round-theclock market for a U.S. exchange. The proposal before the commis-

sion was confined to futures contracts for Japanese yen, Deutsche marks and Eurodollars. However, in an era of computers and instantaneous communications, there is growing interest in a broader range of round-the-clock trading, possi-bly reaching beyond currencies and commodities to stocks listed on the New York Stock Exchange.

Singapore is the major Eurodollar market in Asia, and Eurodollar futures on the Chicago exchange are among the most actively traded

financial contracts. The Singapore-Chicago link will begin on Sept. 6 at 6 P.M. Chicago time, which will be 9 A.M. the following morning in Singapore. According to Merc officials, the link will be the first direct tie-up between exchanges in different countries. Trading hours of the Merc are now from 8:30 A.M. until 4:15

P.M. Chicago time. At first, the two exchanges will keep their current hours but they are reportedly considering links with other markets, in London, for example. If they do so, it would create a round-the-clock market.

"I think it's a very important development because it is a concrete step by a major U.S. exchange and a recognition of the internationalization of the markets." said Thomas A. Russo, a partner in the Wall Street law firm, Cadwalader,

market specialist. "The only downside with it is that because it is somewhat of a pioneering step, if abuses occur, the good news will become bad news.

Of prime concern to Mr. Russo is that the commodities commission might find it difficult to monitor trading in Singapore that is virtually inseparable from trading in Chi-

Glenn W. Clark, a McLean, Virginia, commodities consultant, was also skeptical about the ability of the commodities commission to police the overseas market, with Singapore 13 hours ahead of Chicago. "I have great confidence in Singapore financial institutions. There's a long, long tradition of successful futures exchange in Asia," Mr. Clark said.

"But I am less confident in the ability of the American regulators to sort this thing out. How on earth a foreign exchange is going to mesh with our regulatory establishment is an unanswered question," he added\_

The two exchanges are creating a mutual offset system of trading. Essentially, this means that a hedger or speculator in either market would operate as if both markets were one. For example, a contract opened in Singapore could be closed in Chicago. The clearinghouses of both exchanges would in effect act as one in debiting and crediting the trader's accounts. All this would be done electronically.

Someone who wants to trade in yen at I A.M. in Chicago could call his broker, who would execute a contract on the Singapore ex-

# Set to Reject Bid by VEW

By Warren Getler International Herald Tribune

Federal Cartel Office said Tuesday it is planning to reject a joint bid by Vereinigte Elektrizitaetswerke Westfalen AG and the government of North Rhine-Westphalia to acquire a 30-percent stake in Ruhrkohle AG, West Germany's largest coal-mining concern.

In a letter sent to the interested parties last Thursday outlining its objections to the bid, the cartel office, which is West Germany's monopolies watchdog body, said that competition in electrical utilities would be endangered if VEW. one of Germany's largest producers of electricity, expanded its Citibank, must still "sell" the Rubrkohle holding to such an extent. Ruhrkohle is the parent company of Steag AG, an electrical made loans to Mexico.

Mexico, which touch

NEW YORK — Prices on the New York
Stock Exchange registered a broad-based gain
Tuesday, thanks to a late burst of buying, but
trading was slow prior to the long Labor Day
holiday weekend.
Analysis said a mild rehound in the hond

Analysts said a mild rebound in the bond market indicated investors are anticipating the government will report Wednesday that the economy is slowing down so that interest rates

Some oils, computers, and stocks involved in takeovers were standouts in the late buying. But lesser capitalized stocks attracted even more attention, according to the breadth of the ad-

vance.
The Dow Jones industrial average, down nearly 3 points at the outset after dropping 8.61 Monday, rebounded 4.19 to 1.232.11. The Dow has risen about 150 points from July's 17-month

The New York Stock Exchange index rose 0.47 to 96.14 and the price of an average share increased 16 cents. Advances led declines 902-579 among the 1,945 issues traded at 4 P.M.

Volume totaled 70.6 million shares, up from the 57.7 million Monday, the slowest session in a year.

The slow trading indicated that many inves-

tors were taking a long holiday. The market will be closed next Monday for Labor Day.

"The bond market improved late in the day and apparently a lot of people are zeroing in on Wedneday's leading indicators report, which is expected to show a decline of 0.6 to 0.9 percent," said Keith Pineoneault of Underwood, Neuhaus & Co., Houston.

17 Month High Low Stock

NYSE Prices Gain; Trading Slow A decline would take pressure off interest rates. "But if there is an increase of good size, there is a chance that would have an adverse impact on the bond market and that it would spill over into the stock market."

Alfred Goldman of A.G. Edwards, St. Louis, said, "The overall market has been in a correction for two weeks and gloom started to creep in. But some investors started to see that breadth had been good and that volume had contracted on weakness and expanded on strength."

John Brooks of Robinson-Humphrey, Atlan-ta, said, "We are in a holiday drifting period but I think the market could get caught up in nother explosion very soon.".

Northeast Utilities, which had 12 months

earnings of \$2.57 a share against \$2.17 a year ago, was the most active NYSE-listed issue, off W to 12 following a block of one million shares at 121/2 Financial Corp. of America was second on the list, up % to 614. Charles Knapp plans to

resign as chairman and chief executive. American Express eased ¼ to 33%. FCA recently sold en million of its Amexico shares. Ramada Inns was the third most active issue, up % to 7%. International Harvester, which rose

4 Monday, was fourth, off 14 to 81/2. 1% Monday, was fourth, off ¼ to 8½.

Exxon was fifth on the list, up ¼ to 43¼.

Mobil gained 1 to 29¼, Texaco ¼ to 35½,

Chevron % to 36½, Phillips Petroleum % to 38½,

Indiana Standard ½ to 59½ and Unocal 1¼ to

39% in active trading.

Atlantic Richfield jumped 1½ to 49¼. Areo

plans to buy back 25 million of its own shares

after taking a \$515-million writedown against third-quarter earnings.

### **BUSINESS ROUNDUP**

# Occidental Seen Selling **Iowa Beef Processors**

By Mark Ports

Washington Post Screece
WASHINGTON — Speculation was rife on Wall Street Tuesday that Occidental Petroleum Corp. may soon sell its Iowa Beef Processors division, the largest U.S. beef

The sale, it was speculated, would allow Occidental's 86-yearold chairman, Armand Hammer, to complete a purge of directors and officers who disagree with his management of the large Los Angeles-based oil company. Last month, Occidental bought

out one of the company's largest stockholders, David H. Murdock, for more than 40 percent more than no comment on the reports of the his stock was worth. Mr. Murdock possible sale of Iowa Beef. acted as matchmaker in Occidental's \$800-million acquisition of Iowa Beef three years ago.

The removal of Mr. Murdock, whom some analysis had seen as a possible successor to Mr. Hammer.

boud. Mr. Hammer, who is almost as well known for his business dealings with the Soviet Union and China as for anything he has done at Occidental, has ruled the company with an iron hand for more than a quarter of a century, building Occidental from a tiny concern into a major oil, gas and food conglomerate.

was followed last week by the oust-er of Occidental's president, A. Robert Abboud, who was said to be willing to sell Iowa Beef both to be an ally of Mr. Murdock against Mr. Hammer in boardroom dead to redirect his company's as-

son, the company's chairman, who reportedly also frequently sided with Mr. Murdock and Mr. Ab-

Mr. Hammer, Mr. Abboud, Mr. Murdock and Mr. Peterson could not be reached for comment Tuesday. An Occidental spokesman had Wall Street sources put the price-

tag on Iowa Beef at \$600 million to \$800 million, with the divestiture possibly being done as a leveraged buyout that would give Mr. Peterson and other lowa Beef executives ownership of the severed company.

Analysts said Mr. Hammer may

bates.

By selling Iowa Beef, Mr. Hammer would be ridding himself of a third challenger, Robert L. Peter
and to retunect his company's disease sets back into oil and gas. Occidental in recent months has been undergoing a financial and operational restructuring

### 3 Nordic Banks Join to Fight Foreign Influx

STOCKHOLM - Three of the largest banks in the Nordic region announced Tuesday a major cooperation agreement intended to counter an expected influx of foreign banks.

A new group to be known as Scandinavian Banking Partners will be set up by Skandinaviska Enskilda Banken, Sweden's largest commercial bank, Ber-sen Bank of Normy and Union gen Bank of Norway and Union Bank of Finland.

Bank officials hailed the plan as the region's largest coopera-tion agreement and said it would offer customers a network of 850 branches and great ly improved services. Each bank will represent the others in its own country and will acquire stakes of up to 10 percent in the

Foreign banks will be admit-ted to Sweden and Norway in the next two or three years as tight regulations on financial markets are eased. Finland already allows in foreign banks. Few foreign banks have shown an interest in doing business in Norway,

### **Jaguar Planning** To Raise Output **And Work Force**

United Press International LONDON - Jaguar PLC said Tuesday that it plans to expand production and hire an extra 530 workers.

The company, recently taken private, wants to increase produc-tion by 4,000 cars a year, or 11 percent, to meet increased demand. particularly in West Germany and the United States.

Sales in West Germany so far this year are 65 percent higher than in the first seven months of last year. They are also higher than the 12-month total for each of the previous three years, the company

"The increase in the work force has been carefully assessed to maintain our policy of offering secure long-term employment and continuing to improve our produc-tivity," John Egan, Jaguar's man-aging director, said.

### U.S. Wins Tanker Orders

Los Angeles Times Service SAN DIEGO — National Steel & Shipbuilding Co. has signed a \$250-million contract with Houston-based Exxon Shipping Co. to build two oil tankers at its San Diego shipyard.

# New Culture In Europe

(Continued from Page 9)

making money is a good thing.
"The only way to change the has retired from the board and has company's corporate culture is to go through a revolution of people at the top level," says Giorgio Ba-sile, who is responsible for strategic control at Montedison, the Italian pharmaceutical and chemical group that was owned by two government agencies until its restructuring a few years ago.

"The big difference in our new corporate culture is that we now work to make profits," Mr. Basile

There is some consolation for European managers who have been slow to eatch on. If intrapreneurship is just another U.S. fad, Europeans can learn from the mistakes of Americans.

The collapse of the settlement was disclosed Monday in a proxy statement filed with the Securities and Exchange Commission in Washington by Continental. The company said the shareholder suit was canceled Aug. 16, less that

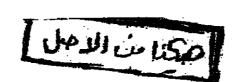

three weeks after it was reached. Lawyers for Continental had no comment of the development other than to say lawyers for both sides were trying to agree on new terms. Shareholders had sued Continental Illinot Corp. after the 1982 collapse of Penn Squar Bank of Oklahoma City. They accused the contraction of marking its difficulties used to contract of the contraction of marking its difficulties used.

Other sources also indicated the shareholder: were seeking more money in light of a July 2c announcement that the Federal Deposit Insurance Corp. planned to take over the bulk of bac loans by Continental Illinois National Bank & Trust Co. in return for an 80-percent equity interest in the bank holding company.

against the plan," the company said.

# **Continental Says Shareholder Pact Has Collapsed**

The Associated Press

CHICAGO - A tentative settlement of a shareholders' lawsuit against Continental Illi-nois Corp. has collapsed amid reports that the plaintiffs feel they can get a better settlement now that the federal government has rescuel

poration of masking its difficulties until after Penn Square folded.

Nicholas E. Chimicles, one of the shareholders' attorneys, said negotiations had resumed with lawyers for the bank, but he declined to discuss details of why the agreement was stranged.

"The whole restructuring of the bank cause, us to reassess the entire settlement that have been disclosed," he said.

one lawyer familiar with the case said, the

One lawyer familiar with the case said, the shareholders feel they can do better "now that the bank is back on its feet."

The proxy statement filed Monday also disclosed that a new class-action shareholder suit was filed last Thursday against Continental. The new suit was filed on behalf of people who bought Continental stock from July 6, 1982, when Penn Square was closed, to July 25, 1984, the day before the FDIC rescue was disclosed. Meanwhile, Continental Illinois Corp. on Monday urged shareholders to approve the \$4.5-billion government rescue plan for the bank, or see it go under.

"Approval of the plan of restructuring by common stockholders is essential to the survival of the corporation as a viable institution, and

of the corporation as a viable institution, and ailure to vote has the same effect as a vote

On Sept. 26, stockholders are to vote on the rescue plan. If stockholders reject it, the FDIC has said it will dissolve the bank.

The state of the s

BLACK WATER: The Book of Fantastic Literature.

Edited by Alberto Manguel. 967 pp. \$11.95. Potter, I Park Avenue, New York, N.Y. 10016.

Reviewed by Douglas E. Winter

D SYCHOANALYST Charles Fisher wrote I that "Dreaming permits each and every one of us to be quietly and safely insane every night of our lives. "Alberto Manguel's hefty anthology "Black Water" confirms that these words apply as well to the waking dreams of horror fiction. Collecting the work of 72 writers, Manguel has produced a celebration of nightmarish imagination, a monument to the literature of what Wallace Stevens called "black water

breaking into reality."

The tale of terror, as Manguel aptly demonstrates, is perhaps the most timeless and inter-national of stories. "Black Water" spans sever-al centuries and five continents; its authors include Belloc, Cocieau, Cortazar, Dickens, Hawthorne, Kipling, Pushkin, and Wilde.

Loosely structured around certain principal motifs - time warps, hauntings, dreams, unreal creatures and transformations, mimesis, and dealings with God and the Devil - "Black Water" is "born from its own rules," an idiosyncratic collage that is widely illustrative of the literature of terror but offers neither thematic nor historical progression. At a length of nearly 1,000 pages, it is less a book to be read than one to be sampled. Readers accustomed to the faster pace of modern popular fiction may also find the volume's abundance of older, more mannered stories further reason for patient consumption.

Manguel, an Argentinian now living and teaching in Toronto, has previously co-authored "The Dictionary of Imaginary Places." He attributes his interest in dark fantasy to a childhood encounter with the "Arabian Nights," but the stories he offers here are decidedly adult in tone and intent. There is little reassurance in "Black Water"; its vision seems direly pessimistic, mitigated only rarely by such dark humor as Joanne Greenburg's "Certain Distant Suns." Manguel cares little for violence or shock, however; his selections probe "the expectancy of horror," those unqui-et moments when the very nature of life — or the possibility of an after life - is doubted, eliciting the final emotion experienced by Som-erset Maugham's "Lord Mountdrago": a "strange, primeval terror of he knew not what." Few tangible monsters (save man himself) stalk the pages of "Black Water"; Manguel admits an insectile phobia with Italo Calvino's "The Argentine Ant" and Howard Fast's "The Large Ant," but the overwhelmingpresence here is that of something only dimly seen - less a ghost than an indefinable blur or stain, as impenetrable as the image chosen for the collection's title. As the victim of J. B. Priestley's "The Grey Ones" wryty observes:
"It's as if we were all compelled to send our washing to one huge sinister laundry, which returned everything with more and more color bleached out of it until it was all a dismal

gray."

Given the unremitting bleakness of Manguel's selections, why is it so easy to find pleasure in the pages of "Black Water"? The answer lies not simply in the consistent quality of its entries, but in the nature of the horror story itself. "I don't know exactly what it is that moves us when we read a fantastic story,

Manguel writes in his foreword. "Perhaps it the gnawing suspicion that what has been imagined, however preposterous, has a place in the suspicion with the suspicion of the susp the world and in our lives." The tale of terror is our chance to enter the realm of dreams - to be quietly and safely insane in the face of our-anxious lives and inevitable deaths, immersing ourselves in the black water of the unknown and emerging again like Lazarus, renewed with-the almost childish delight of having faced our greatest fears and survived.

Douglas E. Winter is the author of "Stephen-King: The Art of Darkness," due out this fail. He wrote this review for The Washington Post.

### Giants 5, Expos 4 In Montreal, Bob Brenly dou-

bled in one 11th-inning run and reliever Frank Williams singled home another, and San Francisco held on to nip the Expos, 5-4. Williams (9-2) earned his third victory in the Giants' last five games despite giving up a run-scoring single to Gary Carter in the bottom of the 11th. Reardon (5-7) absorbed his third defeat in the last four days.

### Royals 7, White Sox 4

In the American League, in Kansas City, Missouri, a six-run seventh propelled the Royals to a 7-4 verdict over Chicago, moving Kansas City to within three games of a three-run shot for the Angels. Western Division-leading Minnesota. Sending 10 men to the plate in the seventh, the Royals blew the game open on three singles, two doubles, two errors and a balk.

### Blue Jays 5, Twins 2

to downed Minnesota, 5-2, Lamp. coming off 90 consecutive relief arpearances since his last start on May 17, 1983, allowed three hits in five innings and raised his record to 6-7. Mulliniks, who was 9-for-10 in the four-game series, has eight straight hits and has reached base 10 straight times - both club records. Winning the series, 3-1, the Blue Jays improved their 1984 re-

### cord against the Twins to 8-1. Indians 7, Brewers 1

In Milwaukee, Joe Carter hit two home runs and Andre Thornton and Chris Bando added one each in support of Bert Blyleven's four-hitter as Cleveland trampled the Brewers, 7-1.

### Orioles 7, Angels 6

In Anaheim, California, Rich Dauer's 10th-inning sacrifice fly scored Mike Young from third and gave Baltimore a 7-6 decision over California. Al Bumbry, Cal Ripken

### Yankees 8, A's 7

In Oakland, California, rookie Bobby Meacham hit a two-run home run in the eighth to make New York an 8-7 victor over the A's. Oakland, which has lost nine In Minneapolis, Rance Mullin- straight games, had gone ahead. 7iks went 3-for-3. Ernie Whitt hit a 6, with a seven-run seventh in Lamp won as a starter for the first runs on his 32d homer of the year

## Sic Transit Conventions

By Russell Baker NEW YORK — I'm a political innkie. I used to go to all the national conventions, and several of them were worth attending, but by 1972 all the juice had gone out of them, and I quit bothering.

The fault lay with the uplift movement, which had an idea that was hard to beat for inspired absurdity. This was to take the job of nominating presidential candidates away from professional politicians and give it to advertising men.

This reform was accomplished by expanding the number of primary elections, in which limited percentages of voters could be readily manipulated by mass-media marketing techniques. None but the black-hearted dared laugh at the absurdity of a political process purified by admen, for was the primary system not "democratization," and is democracy not a splendid thing?

Democracy by mass marketing doomed the national convention. which had been a traditional mammoth television entertainment

By 1972 the "democratization" was so far advanced that conventions were no longer needed for nominating candidates. As a big news item for press and television, the convention by 1972 was dead and ready to have the dirt shoveled

This dawned on me that year when I went down to Miami Beach to watch the Republicans renominate Richard Nixon, a proceeding that could have interested only the sort of person who enjoys watching ice melt.

I had attended conventions like that before - in 1956, for example, when Republicans renominated President Eisenhower. At that one, though, the Republicans were still doing most of those other interesting things politicians always did at conventions, which included boozing back-stabbing and trying to outmaneuver each other for this or that advantage.

By 1972 these essential political activities seemed to have ceased, for by that time the convention was viewed by party bosses purely as a television show — a photo oppor-tunity, as it would be called nowadays. And what an opportunity: A

multimillion-dollar gift of free TV time from all three networks. I immediately flew home and have seen no reason to attend a convention since. The best place to watch a television show is by your television set. This year the networks have finally realized what I realized 12 years ago; to wit, that

the grand old show is far beyond rigor mortis. Still, perhaps in terror of politicians who have the power to push them around, the networks provided two hours a night of prime time for both parties this year. Here was

a challenge: Could the parties come up with two hours of TV entertainment four nights running? No easy task, to be sure, but in return for that priceless gift of free TV exposure the parties, one might have supposed, would enlist the leading entertainment geniuses of the age.

They did not. The Democrats had the good fortune to have a natural entertainer, the Reverend Jesse Jackson, available for duty on camera. They had the further good luck to get an effective TV performance out of Mario Cuomo.

They also had Senator Edward Kennedy, delivering a stream of outrageous oratorical baloney with a roar, a grin and a wink that said he knew as well as we did that he was talking nonsense, but wasn't it fun? And wasn't it entertaining? It

The Democrats are unlikely to be so lucky again, if the networks ever again cover the conventions. If they refuse, nobody who watched the Republicans last week can blame them. The press, unduly sensitive about accusations of a liberal bias, has given the Republicans more breaks than they deserve lately, which probably explains why no one has yet pointed out that if the Republican convention had been an out-of-town tryout, it would have folded in Bridgeport.

As a political junkie, I tried to stay awake. Heaven knows, I tried. And failed. Every time I awoke briefly, some Republican was talking about Walter Mondale. Walter Mondale is dull. Why don't the

Republicans know that? The networks will probably dump conventions altogether by 1988. The dumping is long overdue. New York Times Service

# Exiled Cuban Writers Relish Liberty

By James Brooke New York Times Service NEW YORK — Reinaldo García Ramos used to write poetry in longhand because typ-ing provoked the curiosity of the "defense committee" in his Havana neighborhood. He wrote in a world where pa-

per was scarce, typewriters were rarely sold to individuals, and presses and mimeograph machines were the property of the state. Today García Ramos works

out of a walkup apartment in the Clinton section of Manhattan. The neighbors may bang a broomstick on the floor if he types late at night, but they do not come by in the morning to read what he typed.

"It is delirious," said René Ci-fuentes, another Cuban writer and a friend of Garcia Ramos. "For the first time in our lives, we don't fear that the secret police will come into our houses, grab our writing and throw us in jail."

Cifuentes, Garcia Ramos and Reinaldo Arenas, are Cuban writers who came of age under But after living more than two decades under Communist rule, they were among the refugees who left the Cuban port of Mariel

for the United States in 1980. In all, 125,000 Cubans left at the Now, the three middle-aged men are editing Mariel, a Span-

ish-language literary magazine, and are learning about U. S. freedom of expression in the process.
"Any of us would be in jail in Cuba for publishing a scrap of what we have published," said Cifuentes, who spent three years in prison in the early 1970s for trying to emigrate.

Garcia Ramos, who worked for eight years in a Cuban state pub-lishing house, said, "We would be tried under the law of ideological diversionism. One lesson they have learned

about the free marketplace of ideas is that a publication must sell to stay on the market. Stacked in the corner of Ci-

# PEOPLE

# The Ararat Scramble

brought to the United States for laboratory analysis, a spokesman Hong Kong today. for one of three expeditions thatclimbed Mount Ararat said Monday. Earlier in the day, Turkey's minister of culture and tourism said in Ankara that American expeditioners would be forbidden from removing the samples from the country if there was a chance they had historical value. But the announcement came too late. Ron Wyatt, a member of one expedition, displayed samples at a news conference in New York and said they would be analyzed in Knoxville. Tennessee, to determine their content and approximate age. James Irwin, a former U.S. astronaut, who is leading a second expedition, accused Wyatt and Marvin Steffins, president of U.S. International Expeditions, of unfairly seizing the samples. And Professor John Morris of the U.S. Institute for Creation and Research, the third group looking for the vessel,

said it was "impossible to accept" Steffins's samples as evidence of the discovery of Noah's Ark. "All Stellins has is soft clay and not wood," he said. Irwin said Steffins and Wyatt sneaked away with what they later claimed were wooden fragments of the ark after he had led them to the spot on the slopes. metal tests indicated that the rocks may contain oxidized bronze, copper or tin that could have been used as metal brackets on a boat. "There is no room for doubt in my mind that this is a boat," he said. "The

debut performance in Taiwan drew cheers from an audience of about 2,600 that refused to end a standing ovation until the conductor, Zubin

A 14-year-old American boy sneaked cato a Sydney-bound airplane and talked his way through immigration and customs officials so he could see Australia, officials said Tuesday. The immigration department in Australia said David . John Smith arrived in Sydney Sunday after sneaking onto a flight from Honolulu. A Qantas Airlines spokesman said Smith said he had stowed away after joining transit passengers en route to Sydney at Honolulu's airport. He apparently boarded the plane after asking an official if he could go and get a coat he had left on the plane. The youth then hid in the bathroom of the plane. The teen-ager came to Auswas netreved to have landed.
"What Stelfins is doing is a shame and illegal," Irwin said Monday in Zogubeyazit, 600 miles (970 kilometers) east of Ankara Illegal. through immigration and customs checks by saying he had gotten lost and strayed into the area while looking for his mother, an immigration department spokeswoman said. He hitched a ride to Bondi Beach in the Sydney suburbs and question is: Is this boat Noah's Ark spent some time there before taking or is this boat there for some other a taxi back to the airport, where he apparently hoped to hide aboard another plane back home. But Smith did not have any money to The New York Philharmonic's pay the taxi fare and the driver turned him over to airport police. Smith told police that he lived in a child welfare center in Honolulu and that he had been placed in the Mehta, returned to the stage four facility after stowing away on a times.
